Dear Mr. Seljeseth,

As Eric Feldman wrote you, Darrell and the company have parted, entirely amicably I might add. Darrell has formed his own software company in S.F. called "Studio Software".

If you are willing to wait at least 1/2 year, we will have a midi interface (capable of handling CV-s for at least 8 voices, including sliding tones). We are also planning a second midi product, one which will adapt nearly any scanned-type keyboard (such as the very low cost CASIOs) to midi, with CV-s for one full synthesizer voice. This too is still 1/2 year off...

Thanks for your interest,

Serge Tcherepnin.
