MODIFICATIONS FOR THE SERGE SYNTHESIZER

PRICE LIST - June 1983

CODE	DESCRIPTION	KIT	FACTORY
CYC	Cycle Switches (2) for DSG or DTG Same as patching Trig Out to Trig In with patchcord but also disconnects any input connected to the Trig In jack.	8.00	18.00
FB	Feedback Controls for DSG (2) Same as feeding Output to CV in to get exponential shaping on ramp. Recommended for long amplitude envelopes, and for getting "fatter" envelope sounds. CV input is not tied up with this internal mod.	8.00	25.00
BIP	Bi-Polar Output for DSG or DTG (2) Output is level shifted and inverted by 2.5 volts.	1.00	10.00
ACI	AC Inputs for DTG (2) Same as black Input jacks on DSG.	1.00	10.00
VCQA	VCFQ Variable "Q" Input Attenuator Allows attenuation of CV at VC-Q input.	3.00	12.00
NOIL	Output Level Controls for PINK and WHITE Noise Provides master level controls for noise outputs.	6.00	14.00
LED	LED Add-on for Noise Source RANDOM VOLTAGE Activity indicator for NOI random voltage.	5.00	12.00
LED2	LED Add-ons for SSG, POS/NEG SLEWS (2) Activity indicators for outputs.	10.00	24.00
ASRL	2ASR Link Switch Links the two units to form a 6-stage ASR.	4.00	10.00
OCT	Octave Switch for NTO's and PCO's (2) PC board has components for two octave switches. Oscillators must be on same panel. Up-Norm-Down Octave by three position front panel switch.	17.50	35.00
VCMA	Input Attenuator for VC inputs on VCM (2) Allows CV inputs to be attenuated on lower two sections.	12.00	22.00
TKB2	Second CLOCK Input for TKB Allows two clock sources to simultaneously advance TKB Sequence.	.50	5.00
U/D	UP/DOWN Switch for TKB Manual control the same as front panel UP/DOWN Input jack. Overrides input when switched to DOWN. Normal function in UP position.	4.00	10.00
TKBM	TKB Pulse Output Mod/with Logic Buffer Three position switch is installed to provide the 16 Gate outputs with gates that sustain only as long as associated touch pad is touched. In second position, gates are converted to triggers and can be muted for producing complex rhythms.	45.00	85.00

Modifications purchased as KITS will be provided with all parts and wire required, with instructions for the *experienced* assembler. On many modifications, additional holes must be drilled into the front panel. We assume no liability for damages incurred when modifications are done by other than factory personnel.

Modifications done by Serge Modular at our FACTORY require that the panels be shipped, pre-paid, back to our San Francisco facility. All shipping costs will be added to the total bill so please include enough for return shipping. We will ship C.O.D. if not paid in advance. All mods carry a 1-Year guarantee and do not affect our original warranty. These modifications will not be performed on panels originally purchased as kits if they are not assembled strictly in accordance with our Kit Manual (Panel/Racks must open up, and wiring must be neat and secure, as determined by SMMS).

California residents please include 6 1/2% sales tax.
